Neuroscience and education

2012 Meeting of the EARLI SIG 22

May 24th – 26th, 2012

Institute of Education, University of London

Keynote speakers:

- Torkel Klingberg (Department of Neuroscience, Karolinska Institute)
- Fumiko Hoeft (Centre for Interdisciplinary Brain Sciences Research, Stanford University)
- Paul Howard-Jones (Graduate School of Education, Bristol University)
- Michael Thomas (Birbeck College, University of London)

Call for papers:

In addition to the keynote lectures, there will be an interactive poster session. We invite participants to submit a poster proposal to neuroedu.sig22@gmail.com. The proposal should include the name of the authors, presenting author, title and a 200 word abstract of the poster.

We target research at the intersection of neuroscience and education. Only proposals that contain empirical data will be accepted.

A limited number of poster proposals will be further selected for oral presentation. This selection will be done by a reviewing committee. Proposals are rated in terms of scientific quality and scope.

Authors of accepted posters will be explicitly asked to discuss their findings in one-on-one or in small groups during the poster session and to answer the attendee's questions.

Important dates:

Deadline for poster submission: 15 January 2012

Proposals confirmed: 15 February 2012

Deadline for registration: 1 April 2012

More information will be available soon at <http://www.educationalneuroscience.org.uk/events.html>

Please contact neuroedu.sig22@gmail.com for further questions

Organizing committee

Andrew Tolmie (Institute of Education, University of London, UK)

Bert De Smedt (Faculty of Psychology and Educational Sciences, Katholieke Universiteit Leuven, Belgium)

Daniel Ansari (Department of Psychology, University of Western Ontario, Canada)

In collaboration with

European Association for Learning and Instruction, Centre for Educational Neuroscience London, American Educational Research Association Brain Neurosciences and Education SIG, International Mind Brain and Education Society
